MSIB CERTIFICATE

Number: 2085/IL-SIB/I/2024

THIS CERTIFICATE PROUDLY PRESENTED TO:

IMAMUDDIN AL MUSTAQIM

2100018076 - Universitas Ahmad Dahlan - Teknik Informatika

For completing:

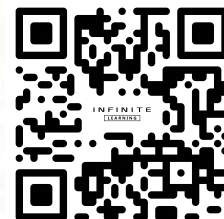

MSIB BATCH 5

This certificate is awarded for completing
Independent Study Program Batch 5 on Red Hat Certified System Administrator - IBM AI & Cybersecurity
at Infinite Learning From August 2023 to December 2023

Batam, 02 January 2024

Ari Nugrahanto, B.ED, M.Sc

Hard Skills

NO	SKILLS	SCORE	DESCRIPTION
1	IBM Cybersecurity	90.83	Ability to understand cyber threats taxonomy and explain cybersecurity real cases: cybersecurity domains, cybersecurity industry challenges, cyber resilience frameworks & lifecycle. Analytical skills in network security landscape, enterprise network security, anatomy of a network attack. Ability to understand mobile & IoT global trends, security landscape and end-point security. Ability to understand web applications, apply application security practices, analyze application security attacks, explain data breaches in the industrial world. Ability to analyze insider threats, phishing, ransomware, fraud attacks. Ability to understand industry cases: cloud global trends, cloud security challenges, cloud security in practice. Ability to explain landscape SIEM (Security Information and Event Management), SIEM Characteristics, SIEM in Action, SIEM Explained, SIEM Identifies a Phishing Attempt, Using the SIEM. Ability to analyze threat landscape, anatomy of a cyber attack, threat hunting methodology, tradecraft and TTPs. Ability to explain and implement the Security Operations Center, SOC operations team, SOC incident lifecycle. Ability to collaborate in design thinking.

NO	SKILLS	SCORE	DESCRIPTION
2	RedHat System Administration	95.0	Ability to access the command line. Understand the Linux file system with a hierarchy of concepts. Read the manual page via the command line. Redirect output to a file or program. Describe user and group concepts. Interpreting linux file system permissions. Process status and lifecycle system. Identify system processes automatically. Remote access via SSH using the command line. Describe the system log architecture. Networking concepts. Manage compressed "tar" archives. Register systems for Red Hat support. Identify file systems and devices. Writing simple bash scripts. Create a user job schedule. Set tuning profiles. Configure SELinux mode enforcement. Manage partitions, file systems, persistent mounts, extend logical volumes. Manage network-attached storage with NFS. Select boot target. Configuring server firewalls. Install Red Hat Enterprise Linux. Container concepts
3	IBM Artificial Intelligence (AI)	90.67	Ability to understand and explain artificial intelligence, AI industry adoption, natural language, computer vision, machine learning and deep learning, future trends in AI. Ability to apply client sentiment analysis with existing services in IBM Cloud, develop virtual assistants and AI conversational agents with Watson Assistant. Ability to analyze fairness models with Watson OpenScale, Python programming ability to predict fraud with IBM Cloud Pack for Data's Jupyter notebook, and ability to collaborate in design thinking.

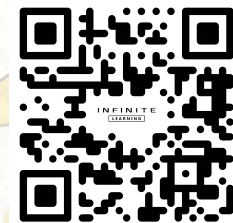

Soft Skills

NO	SKILLS	SCORE	DESCRIPTION
4	Professional Skills Collaboration, Communication and Adaptation	95.00	Basic skills in communicating verbally or the ability to speak. Good body language skills, facial expressions, eye gaze, hand movements, and several other gestures. Ability to write to convey ideas or ideas, solutions and detailed explanations of a project. Ability and understanding of listening techniques properly and carefully so that there are no misunderstandings in communicating. Presentation skills.

SCORE	GRADE
85-100	A
80-84,99	A-
75-79,99	B+
70-74,99	B
65-69,99	B-

SCORE	GRADE
60-64,99	C+
55-59,99	C
45-54,99	D
0-44,99	E
